03/10/2024

Conferencia: (Mis)alignment of scientific outcome with funding: the case of green energy technology in South Korean Green Growth mission

Ponentes: Soohong Eum, investigador de la Universidad de Leiden.

Lugar: Salón de Grados de la Facultad de Comunicación y Documentación (Campus de Cartuja)

Fecha y hora: viernes 4 de octubre, de 12 a 13 h.

Idioma de la conferencia: Inglés

Resumen: Government intervention in research and innovation, particularly through funding, aims to address complex societal challenges by aligning research with mission-oriented goals. A study on South Korea's Green Growth mission (2008-2013) found increased short-term research outputs, but limited long-term alignment between funded research and mission goals, and declining commitment post-mission.
